

# WP 4 – Criteria for improved strategies for p&b collection in CE

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

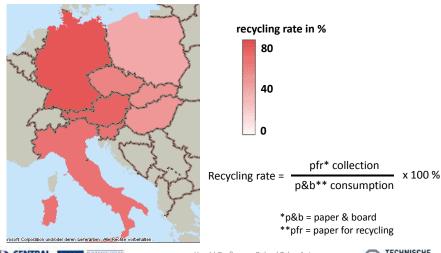

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### Current p&b recycling rates in CE

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

### Criteria for improved strategies for p&b collection in CE

### **Agenda**

- → The paper mills' view
- → The authorities' view
- → The waste management companies' view
- → Pros and Cons
- → Authorities as decision maker
  - Social and technical mixture of influences
  - Decision tree

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### The paper mills' view

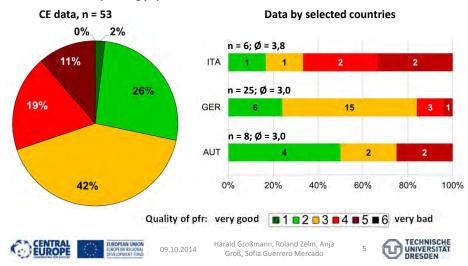

### Paper mills' survey: Satisfaction with quality of pfr

n = number of responding paper mills

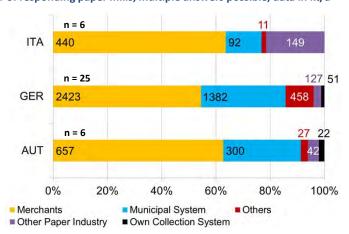

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### Paper mills' survey: Sources of pfr

n = number of responding paper mills, multiple answers possible, data in kt/a

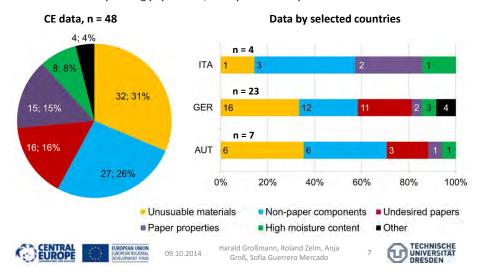

### Paper mills' survey: Problems with pfr

n = number of responding paper mills, multiple answers possible

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### The local authorities' view

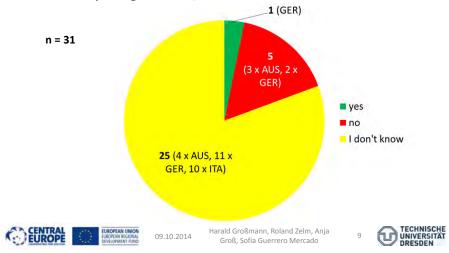

09.10.2014

### **Survey Collection Strategies: Implementation of standard EN 643** for classification after sorting

n = number of responding authorities, data from AUT + GER + ITA

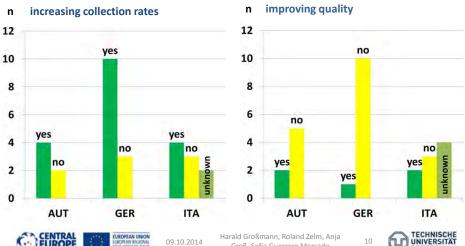

**Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop** 

### Survey Collection Strategies: Changes observed in recent years n = number of answers

Groß, Sofia Guerrero Mercado

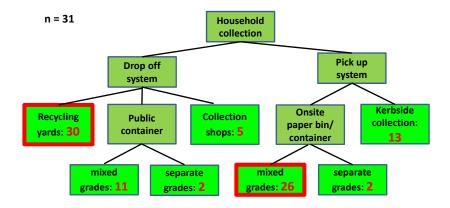

TECHNISCHE UNIVERSITÄT DRESDEN

### **Survey Collection Strategies: Existing collection systems**

n = number of responding authorities data from AUT + GER + ITA, multiple answers possible

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

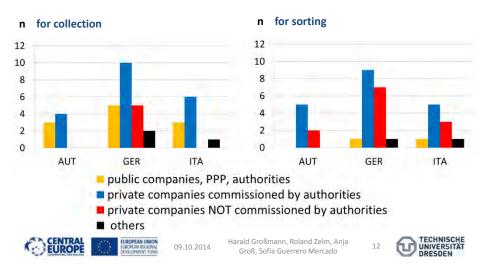

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

# Survey Collection Strategies: Type of organisations responsible for collection and sorting

n = number of responding authorities, multiple answers possible

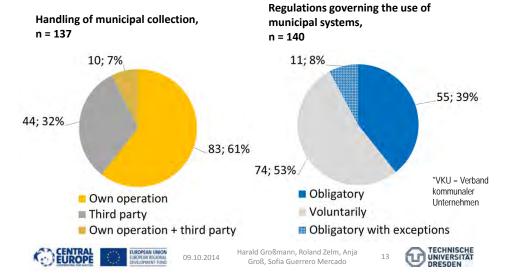

### German data from the VKU\* report 2012: Handling and regulations

n = number of answers

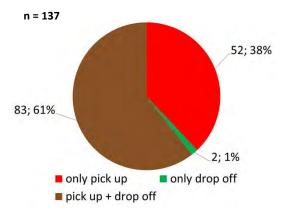

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

## German data from the VKU report 2012: Usage of pick up and drop off systems

n = number of answers

### Trend towards pick up systems

### Drop off system:

inhabitants/public container ≤ 7 m<sup>3</sup>:

- min. 151, max. 5,393
- average 1,246(n = 40)

### Distance to sorting plant/merchant:

- min. 1 km, max. 45 km
- average 13 km (n = 102)

Harald Grossmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

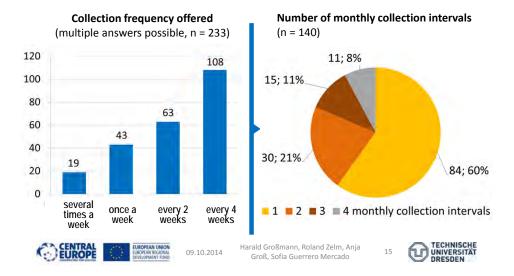

## German data from the VKU report 2012: Collection frequency (pick up), n = number of answers

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

# The waste management companies' view

09.10.2014

### **Statements from Waste Management Companies, Dresden**

### **Economic aspects of manual sorting:**

			Graphic Board paper
	Collection	more economical because of vehicle technology => collection in one tour	=> two collection tours
	Profit- ability	not profitable because of low price difference between deinking and mixed grades	profitable only for already separately collected newspapers/magazines
K	Through-	20 t mixed paper: 6 employees · 8 working hours froß, Sofia (	40 t newspaper/magazines: 2 employees · 8 working hours

**Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop** 

Are automatic sorting plants a possible solution to at least partly solve the pfr quality problems reported by paper mills?

# **Statements from Waste Management Companies, Wertstoff-Union Berlin**

#### **Economic aspects of automatic sorting:**

	Economic aspects of	. automatic sorting.				
		+				
	Collection area determined by costs for logistics					
	Profitability largely depending on external factors					
	Throughput	120,000 t/year (3/4 blue bin, 1/4 packaging + mixed paper from commercial sources; 2 work shifts á 3 employees for re-sorting)				
*		Only little undesired material in blue bin (charging and collection frequency are crucial for acceptance and quality)	HE AT			

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

# No prediction concerning market opportunities for automatic sorting plants possible

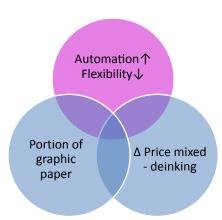

## Sorting plants act in a volatile market with changing consumer behaviour:

- Portion of deinking paper is continuously shrinking
- Paper thievery
- Interplay of supply and demand

Efficiency of sorting plants for lightweight packaging<sup>1)</sup>:

100,000 t/year throughput

5 Mio. inhabitants collection area

### **Pros and Cons**

Conclusions of the World Café at the Paper Collection Strategies Seminar in Sopron (HUN, July 9, 2014)

### Participants of the paper chain

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### **Pros and Cons**

### Commingled collection needs to be banned

- YES: penalties, recommendation to refrain, social pressure
- NO: no bans
- Do not leave decision regarding certain collection system to municipalities!

### Collection should be as easy as possible for consumers

 YES: kerbside (pick up) tops bring banks, improved information, frequency, costs

> New and efficient sorting technologies will have the main impact to solve quality problems of pfr

• NO: quality of pfr is made at home, promotion of sorting

### **Pros and Cons**

Collection strategies have to be supported by PR and public education for best results concerning quantity and quality

• YES, YES, YES and as early as possible

Local authorities should be fully responsible for installing and organising collection from households (independent from market price)

- YES: no open competition
- NO: no assignment of all responsibilities to local authorities

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### **Authorities as decision maker**

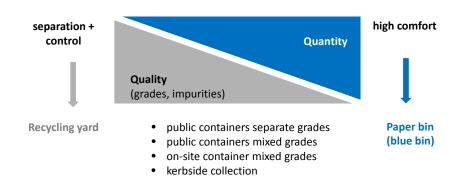

### **Discrepancies prevent ideal solutions**

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

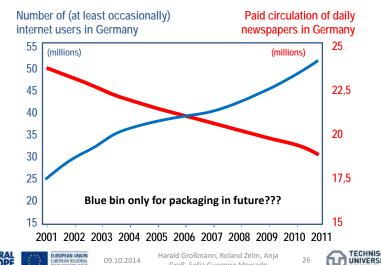

### **Ecodesign for the Enhancement of Central Europe** Paper Based Products Recycling Loop

### What the statistics say

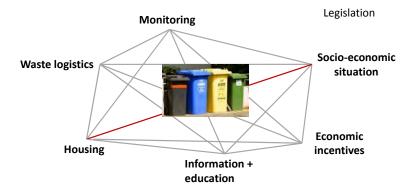

Groß, Sofia Guerrero Mercado

# Is there any potential to increase quantities of pfr from households in countries with high recycling rates?

Relevant factors for waste separation: social technical mixture

09.10.2014

Harald Großmann, Roland Zelm, Anja Groß, Sofia Guerrero Mercado

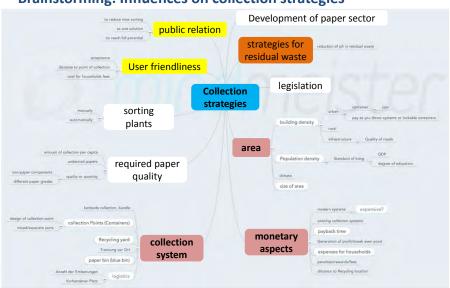

Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### **Brainstorming: Influences on collection strategies**

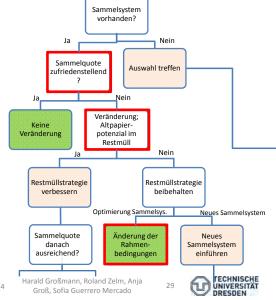

### **Decision tree (excerpt)**

### Prioritisation for introduction of new collection system:

- 1. Building structure
- 2. Focus on quality or quantity of pfr
- 3. Space for collection system
- 4. User friendliness
- 5. Level of investment

09.10.2014

### Ecodesign for the Enhancement of Central Europe Paper Based Products Recycling Loop

### Targets for collection rates: LCA-IWM project

Paper & board			
Average potential in kg/(c·a)	Rate of separate* collection		
	Average in %	Max. in %	
119.7	45.5	74.2	<b>←</b>
123.8	12.8	33.2	
83.2	4.4	48.9	
46.5	0.8	7.5	
	Average potential in kg/(c·a)  119.7  123.8  83.2	Average potential in kg/(c·a)  Rate of separa  Average in %  119.7  45.5  123.8  12.8  83.2  4.4	Average potential in kg/(c·a)         Rate of separate* collection           Average in %         Max. in %           119.7         45.5         74.2           123.8         12.8         33.2           83.2         4.4         48.9

(GDP, infant mortality rate, employment structure)

<sup>\*</sup> Separate collection means separation of recyclable fractions (not paper grades)

09.10.2014 Ha

Harald Großmann, Roland Zelm, Anja Groß, Wolfgang Ulrich

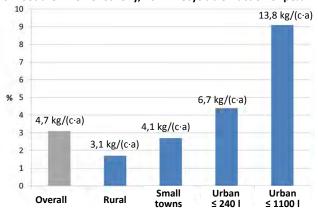

# Is there any potential to increase quantities of pfr from households in countries like Austria and Germany?

Study from Southern Lower Saxony, 2012: Recyclable fraction of p&b in residual waste1)
