

ENHANCING THE QUALITY OF PAPER FOR RECYCLING

EcoPaperLoop Seminar

“Paper Recycling – a necessity for today’s paper loop“

29 Oct 2013, Warsaw

Contents

- Backgrounds and insight into processes + developments
- Know-how on recycling technology
- Up-to-date information on collection and policy of paper for recycling

Who should attend?

- Printers
- Publishers
- Advertisers
- Suppliers of paper for recycling
- Researchers
- Papermakers

This seminar will provide essential up-to-date information and decision-making tools for all stakeholders in the paper chain.

Background Situation

Awareness is the key

Paper for recycling is a major resource. However, the paper recycling rates are still highly inhomogeneous. Since paper for recycling is not only recycled in the country where it is produced, some essential features such as eco-design and ecollection concepts must be developed at transnational level to increase the sustainability of the paper loop. The new project aims at improving the quality of paper for recycling. The EcoPaperLoop project will run until end of 2014. It is co-funded by the European Union/European Regional Development Fund (ERDF) and the local project partners.

EcoPaperLoop Project Partners:

- Innovhub-Stazioni Sperimentali per l'industria, Paper Research Division, Italy (Lead Partner)
- Paper Technology Consulting GmbH, Germany
- Technical University of Darmstadt Chair of Paper Technology, Germany
- Technical University of Dresden, Faculty of Mechanical Engineering, Institute of Wood and Paper Technologies, Chair of Paper Technology, Germany
- Pulp and Paper Institute Ljubljana, Slovenia
- University of Ljubljana, Slovenia
- University of West Hungary (Faculty of Wood Sciences) Paper Research Institute, Hungary
- Polish Packaging Research and Development Centre, Poland
- COMIECO, National Consortium for the Recovery and Recycling of Cellulose-based Packaging, Italy
- Lombardy Region, Italy
